Into The Ovens

Boiling blood

Steam heat

Local action

Free energy

Fossil fuel

Cannibal marrow

Dinosaur

Peace

Aggression engine

Privileged combustion

Rich mixture

Labeled designer proteins

Bake our bread

Poisoned dead

Never again

Corrupted

Loaves and mead

Ground from greed

Earth feeds

Its birthright

Satiation

Appetite

Deity

Sleep

Needs of the many

Met by the few

Unclean spirits

Burn in use

Bake our bread

Poisoned dead

Never again

Corrupted

Gala fiesta under stars

Clear skies without smog

The horizon is easy to see

Sightless crawl in the dark

Malignant contagious islands

Solved by the rising saline solvent

Less than no worth

Their children bear disease

Into the ovens

Fueled future burning clean

Division mended

Whole society

Intolerable fractions

Hooked jagged barbed

Cleaving bonded unions

Carbon nailbomb scars

More gold in the world

Dissolved in the sea

Diamonds are common

Soon so shall be decency

Loaves and mead

Ground from greed

Earth feeds

Its birthright

Needs of the many

Met by the few

Unclean spirits

Burn in use

Bake our bread

Poisoned dead

Never again

Corrupted
